Hi Woralak Chookamnerd,

Congratulations on completing the Disability Inclusion in Education course! We hope you have gained confidence and knowledge to find ways of providing opportunities to support learners with disabilities so that they can participate fully in education.

Before you venture off we have a few quick requests which can help us improve the course:

1. Complete the short [post-course survey](#) and share your experiences with us.
Because this is the first time we are running this course, we are very interested in hearing people's thoughts and experiences of it. Completing the survey shouldn't take you long, and we really value your feedback
2. Leave a learner story and course review on Coursera
3. Leave a [review on Class-Central](#) so others know what to expect in this course

If you loved this course, we'd be honoured if you could spread the word to your friends and colleagues who may also benefit from the course.

If you wish to further your studies, please take a look at the [formal courses](#) on offer at the Disability Studies Division at the University of Cape Town. We also have other courses on Coursera on [teacher empowerment for disability inclusion](#).

Good luck!

Judy, Jane and the TEDI team
